

MAGNIFICENT: DISTINCTIVE FACADE

Located in the high-profile Fairview South Office Park in Falls Church, Va., this elegant eight-story office building features architectural precast panels produced by Smith-Midland Corp. of Midland, Va. "The smooth panel surface was achieved with an acid-wash and a medium sandblast finish," says Ashley Smith, president and COO. A green reflective glass curtainwall and granite wainscoting contribute to the structure's dramatic appearance. Noritake Associates were the project architects.
